

ANYWHERE CAMPING

Ironman 4x4 Luxury Rooftop Tent

THE IRONMAN 4x4 LUXURY ROOFTOP TENT FROM CAMEL 4x4 & OUTDOOR CREATES PREMIUM CAMPING REGARDLESS OF YOUR LOCATION. SIMPLY PARK YOUR 4x4 AT THE TRAIL-SIDE AND WITHIN MINUTES (AND WITHOUT UNLOADING ANY GEAR) YOU CAN BE SNOOZING AWAY ON A COMFY BED, SHELTERED FROM THE ELEMENTS. CAMEL 4x4 & OUTDOOR IS THE EXCLUSIVE DISTRIBUTOR OF IRONMAN 4x4 PARTS AND PRODUCTS IN THE USA AND CANADA.

The Ironman 4x4 tent is manufactured from premium-quality, waterproof and breathable, rip-stop material, and features YKK zippers and fly-screen windows. A raised climate cover flysheet helps control interior temperature, as well as reduce condensation. The lightweight, foldout, aluminum-insulated floor supports a 65mm high-density foam mattress and provides room for two to sleep comfortably. When collapsed, the rooftop tent is kept secure and

protected from the elements by a rugged, 1000D waterproof PVC cover. When open the tent offers ample interior space.

With the tent set up the optional Annex can be hung to create additional privacy around the base of the ladder. The Annex also helps control interior temperature by acting as a wind block for the tent entrance.

The Ironman 4x4 Instant Awning can be added to

the tent to create a shaded multi-use area at the opposite side of the vehicle from the tent entrance. The awning can also be secured to most factory roof bars and/or racks. The Instant Awning offers a quick set up and includes self-standing, extendable aluminum legs, guy lines, and ground stakes. When set up, the awning offers 84x98 inches of 100-percent UV-protected shade.

Whether you're camping for one night or living in your 4x4 on a multi-week trail adventure, the Ironman 4x4 Luxury Rooftop Tent from Camel 4x4 & Outdoors has you covered. **4WD**

The Ironman 4x4 Luxury Rooftop Tent from Camel 4x4 & Outdoor mounts directly to most vehicle roof bars and racks. When collapsed the tent is protected from the elements by a rugged, 1000D waterproof PVC cover.

Easy to set up, the Ironman 4x4 Luxury Rooftop Tent and Annex comes complete with all necessary installation hardware and instructions.

The retractable aluminum ladder is used as a leverage point in folding out and raising the tent.

With the tent raised the retractable aluminum ladder sits under cover from the elements, allowing you to pull off wet gear before climbing in to the tent. A ladder extension kit is available for lifted vehicles.

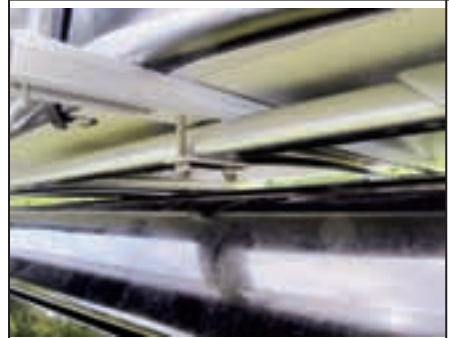

A 65mm high-density foam mattress sits atop the insulated aluminum floor. There's easily room for two, and you could even pile in some small kids provided you don't exceed the maximum weight capacity of your vehicle's roof rack. Overall dimensions for the tent measure 55 inches wide by 94 inches long by 47 inches high.

The Ironman tent is supplied with window awning support rods that can be bent to the appropriate angle to provide increased coverage from the elements. A raised flysheet is also included.

The tent can be situated so that the tent entrance is at the driver or passenger side of the vehicle, or even at the rear, which is recommended for larger vehicles. When mounting the tent with the entrance to the rear you'll need to make sure you have enough clearance for a pop-up rear hatch to open fully.

The supplied roof rack mounts for the tent simply clamp the base of the tent to the factory roof bars. The installation was very simple. This method also allows the tent to be moved from one vehicle to another with minimal effort.

The Annex includes a sturdy, 1000D waterproof PVC zip-in floor and a zip-away panel that allows access in to the vehicle.

The Ironman 4x4 Instant Awning from Camel 4x4 & Outdoor is manufactured from waterproof, breathable material that provides 100-percent UV protection. The Instant Awning secures to most vehicle roof racks and bars. Guy lines and ground stakes are included.

The Instant Awning features self-standing and extendable aluminum awning support poles. When set up the Instant Awning creates 84 by 98 inches of coverage. Optional mosquito netting is also available.

We really like the covered tent entrance and Annex as it greatly increases the functionality of the tent: it creates a sheltered entrance in to the tent and vehicle to access gear or sleeping space; it can be used as a galley or privacy area that's out of the elements; there's even enough room to fit a cot to create additional sheltered sleeping space.

With windows on three sides and the door opening on the fourth side the tent stays well ventilated in hotter climates. The windows can be zipped shut for colder weather camping.

The tent's compact size when stowed won't compromise your vehicle's 'wheeling ability, but do be conscious of the fact that you have additional weight at the top of the vehicle so your center of gravity will be slightly higher than normal. It's also a good idea to measure your vehicle height with the tent installed to ensure that you don't enter a parking garage or other low overhang that may cause damage to the tent and/or your vehicle.
